

Cutting machine operator (m/f/d)

As a cutting machine operator, you ensure that our automated production facilities are running. You will be involved in setting up new systems and will organize and carry out the maintenance and servicing of operating equipment. Your training starts with a comprehensive basic qualification in our training center. You will learn everything you need to know about the manual and mechanical processing of metals. This also includes handling control technology components and industrial robots.

Your tasks:

- Plan and prepare work tasks
- Produce components for tools and castings ready for installation using machine tools or production systems
- Maintain machines and equipment

Your skills:

- Technical understanding
- Independent work / initiative
- Reliability
- Communication skills
- Ability to work in a team
- Motivation / Willingness to perform and learn
