

Technical product designer (m/f/d)

Specialization: Product design and construction

As a technical product designer specializing in product design and construction, you will design and construct components, assemblies, or products according to the wishes of our world-class customers in the international automotive industry. You will advise our customers during the development phase, perform component calculations and simulations, and design tools and molds. In doing so, you will use state-of-the-art calculation and design computer programs.

Your tasks:

- Create design drawings and sketches
- Develop, construct, design and display products, individual parts, assemblies in all details with 3D CAD systems in a functionally and assembly-oriented manner.
- Carry out all necessary calculations, apply dimensions
- Check components and assemblies with computer simulations and special tests
- Create, maintain and manage manufacturing documents, parts lists, standard lists
- Present work results
- Follow the production process through to the finished product

Your skills:

- Technical understanding
- Independent work / initiative
- Reliability
- Communication skills
- Ability to work in a team
- Motivation / Willingness to perform and learn
