

Foundry mechanic with focus on die casting and permanent mold casting (m/f/d)

As a foundry mechanic, you are responsible for manufacturing casting products for our premium customers in the automotive industry. You will produce high-quality parts that are installed in the chassis, powertrain and structure of state-of-the-art cars and trucks, increasingly also for electromobility. You will prepare highly complex casting tools for production, set up casting lines, monitor production and ensure that customer quality requirements are met.

Your tasks:

- Monitor work processes (application of manufacturing procedures and parameters)
- Make molds and cores for casting workpieces from aluminum or other metals
- Melt and hold metal
- Set up, operate, and monitor foundry production equipment
- Demold and post-treat castings
- Prepare permanent molds for casting
- Produce castings on automatic casting equipment
- Plan, check and ensure product quality

Your skills:

- Technical understanding
- Independent work / initiative
- Reliability
- Communication skills
- Ability to work in a team
- Motivation / Willingness to perform and learn
