

Machine and plant operator (m/f/d)

As a machine and plant operator, you are responsible for manufacturing products for our premium customers in the automotive industry. You produce high-quality parts that are installed in the chassis, powertrain and structure of state-of-the-art cars and trucks, increasingly also for electromobility. You prepare highly complex machinery and equipment for production, set up systems, monitor production and ensure that customer quality requirements are met.

Your tasks:

- Monitor work processes (apply manufacturing processes and manufacturing parameters)
- Melt and keep metal hot
- Set up, operate and monitor production equipment
- Post-treat castings
- Set up casting tools and stamping and forming dies
- Produce castings or rolled products on automatic equipment
- Plan, check and ensure product quality

Your skills:

- Technical understanding
- Independent work / initiative
- Reliability
- Communication skills
- Ability to work in a team
- Motivation / Willingness to perform and learn
