

Industrial mechanic (m/f/d)

As an industrial mechanic, you ensure that our automated production facilities are running. You will be involved in setting up new systems and will organize and carry out the maintenance and servicing of operating equipment. Your training starts with a comprehensive basic qualification in our training center. You will learn everything you need to know about the manual and mechanical processing of metals. This also includes handling control technology components and industrial robots.

Your tasks:

- Plan and prepare work tasks
- Build and install equipment, machines and production lines
- Maintain machines and equipment
- Control and optimize production processes

Your skills:

- Technical understanding
- Independent work / initiative
- Reliability
- Communication skills
- Ability to work in a team
- Motivation / Willingness to perform and learn
